

PAGE STRUCTURE GUIDELINES

GRID

1. Ensure proper grid alignment.
2. Each column width should fit the data, and column headers must be fully visible.

DROPDOWN

3. Dropdown width should be adjusted so all data is clearly visible.

TOOLTIP

4. Add meaningful and detailed tooltips for icons.

MODAL

5. Add validation and mark required fields with a star (*).
6. Modal size should dynamically fit the data displayed.

LEGENDS

7. If colors are used for indication, include legends explaining each color.

OTHER GUIDELINES

8. Avoid horizontal scrolling; ensure grid fits within the page.
9. Align values to the right, text to the left, and headers to the center.
10. Avoid vertical scrolling due to layout issues; check for unclosed divs.
11. Use consistent icons. If multiple icons exist, label column header as 'Action'.
12. Breadcrumbs should match the menu name.
13. Ensure all columns support filtering and sorting.
14. Pagination: Show 15 rows if space allows, otherwise 10 rows.
15. Ensure grid data can be copied.
16. Limit pinned columns to a maximum of 3.
17. Provide a help icon with page description and usage.
18. Ensure refresh icon functionality works correctly.
19. Grid columns should start with 'Code' and 'Name'.
20. Dropdown values should be ordered (ORDER BY).
21. Modal heading should be clear and meaningful.
